

EVE - GENESIS™ · THE TRAINING CORPUS

The architecture cannot leak what is not present.

100% synthetic by construction. Per-vertical editions. The CISO-facing answer.

Eve-Genesis™ is the synthetic-corpus methodology that fine-tunes the domain reasoner inside every Eve-Fusion™ instance. It is 100% synthetic by construction — no customer data, no scraped records, no exfiltrated case files, no proprietary curricula train any product’s reasoning. An architectural property, not a policy promise.

01

Clinical Edition

Powers ChironAI™. Trained to reason like a senior clinician across the relevant differential, regulatory chain, and consultation context.

02

Education Edition

Powers ArthurAI™. Trained on canonical curricula, pedagogical taxonomies, and the editor pattern that defines educator-attested instruction.

03

Law Edition

Powers JustineAI™. Trained on procedural taxonomies, demand-letter pipelines, and the supervisor pattern. CourtListener-anchored.

04

Theology Edition

Powers TheoAI™. Calibrated to the Tahqiq methodology, the 12-tier narrator system, and the Ibn al-Salah five-condition framework.

05

Financial Edition

Powers EliAI™. Trained on valuation reasoning over comparable settled matters, lien perfection, and counterparty behaviour.

06

Held-out Evaluation

Each edition is evaluated on a held-out test set sourced independently from training. Convergence with senior-practitioner reasoning measured per release.

ON THE ARCHITECTURE

Generated by Eve — the autonomous reasoning system that authors synthetic training data in the voice of a senior practitioner across each vertical. Generation is followed by structural validation, regression evaluation, and adapter-based fine-tuning of the domain reasoner. The base model is never modified.

ON TRUST + COMPLIANCE

Synthetic-by-construction is the single most decisive procurement signal in regulated industries. HIPAA does not apply to data that does not exist. FERPA does not apply to records that were never collected. Attorney-client privilege does not need to be re-architected.
